

STEP CHANGE IN SAFETY

Who?

Step Change in Safety is unique – no other industry has such a body.

We bring together:

- oil and gas companies
- the offshore workforce
- trade unions
- regulators (HSE & CAA)

Step Change welcomes input from people on **all levels, from senior leaders to the workforce**, to allow everyone to play their part.

We have more than **140 members** who participate, demonstrate strong safety leadership and play their part in making the UK oil and gas industry the safest place to work in the UK.

What?

Step Change is a not-for-profit organisation based in Aberdeen. Our organisation is focuses on sharing and learning - we aim to make the UK oil and gas industry the safest place to work in the world.

We work all year round with industry leaders and experts to create best-practise guidelines and showcase safety.

The Step Change leadership team comprises of **30 industry leaders** and elected safety reps who meet **throughout the year** to proactively discuss safety leadership in the offshore oil and gas industry, determine priorities and provide guidance to the steering groups.

When?

As well as industry meetings, Step Change host **regular events throughout the year** which are **free** for members to attend and typically focus around a relevant theme.

We share best practise at networking events, offer case studies at business breakfasts and update industry on our progress throughout the year. All our events are advertised on our website where you can download a schedule for the year.

Step Change is important as it concentrates solely on the safety of the workforce. By being involved with Step Change, I am able to raise the concerns, issues, ideas and my workmates ideas with the leaders and regulators of the industry.

Joe Kirby, Elected Safety Rep,
Step Change Leadership Team

Being part of Step Change has meant that I can communicate information offshore about what's going on in the industry so that everyone can be engaged.
